

django

Add CSS

open `urls.py` of main project(mainpro)
paste the following Code:

```
from django.conf.urls import include, url  
from django.contrib import admin
```

```
urlpatterns = [  
    url(r'^admin/', admin.site.urls),  
    url(r'^demo/', include('subpro.urls')),  
]
```

make a new file with name **urls.py** in sub
project(subpro)

paste the following Code:

```
from django.conf.urls import url  
from . import views
```

```
urlpatterns = [  
    url(r'^$', views.basic,name='basic'),
```

First make a folder with name **templates** in sub project. then again make another folder named with **subpro** inside **templates** folder.

<html>

<body>

Baisc Program Work

</body>

</html>

Open `views.py` of sub project(subpro)

paste the following Code:

```
from django.shortcuts import render,loader  
def basic(request):  
    return render(request,'subpro/basic.html',{})
```
