

**django**

# Add CSS inside Django

first make **static folder** and **subpro folder(which is inside static folder)** in sub project.

We can add image,css and Bootstrap folder inside it.

make one **design.css** program

```
#div1{  
    height:400px;  
    width:400px;  
    border:solid green;  
    background-image:url('images/d.jpg');  
    background-size:100% 100%;  
}
```

Open welcome.html from (template->subpro->welcome.html)

**<html>**

**{% load staticfiles %}**

**<head>**

**<link rel="stylesheet"  
type="text/css" href="{% static  
'subpro/design.css' %}">**

**<link rel="stylesheet"**
