JavaScript Comments

- Single Line Comments

    // This is Single line comment

- Multi-line Comments

    /* This is

    Multi-line Comment */

Previously we use document.write() to print some text in java script.
How we print something inside HTML with the help of JavaScript?

- Now We Use

document.getElementById("idname").innerHTML=varname;

Date Function

```
<head>
  <script>
    function dt()
    {
      var e=Date();
      document.getElementById("a").innerHTML=e;
    }
  </script>
</head>
<body>
 <div style="border:solid; height:50px; width:300px" id="a">  </div>
 <input type="submit" value="Date" onClick="dt()">
</body>
```
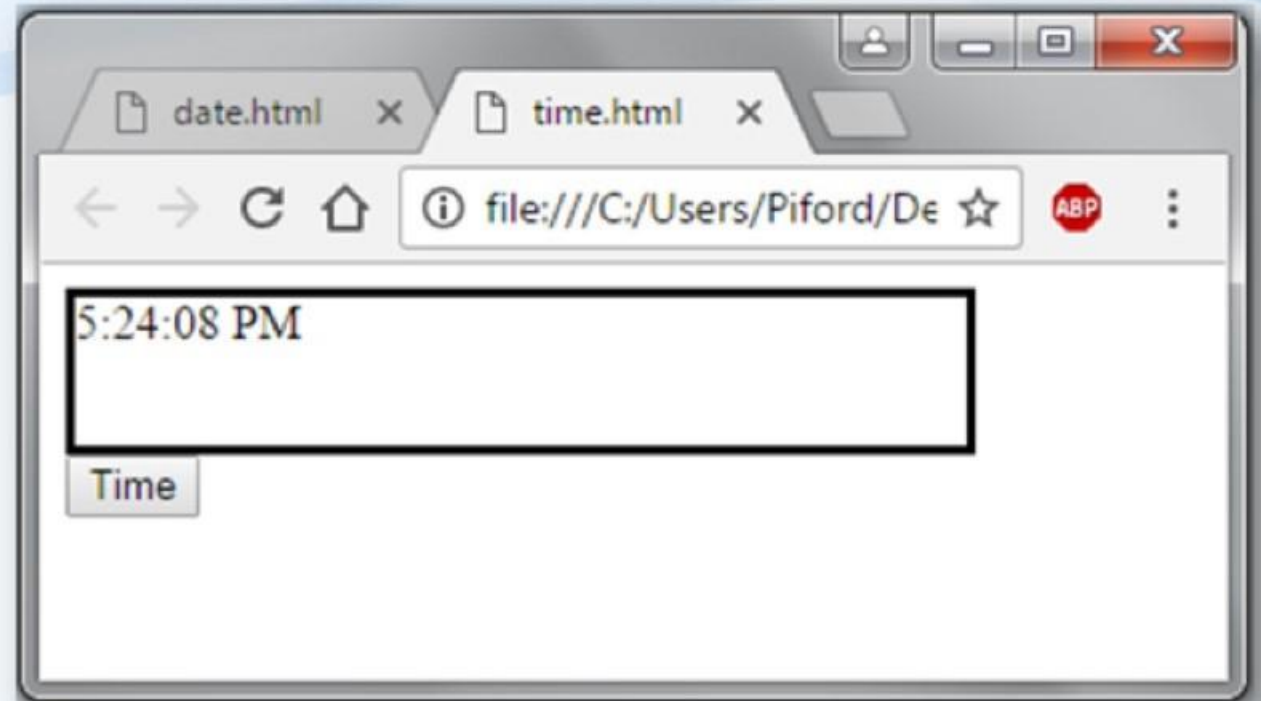

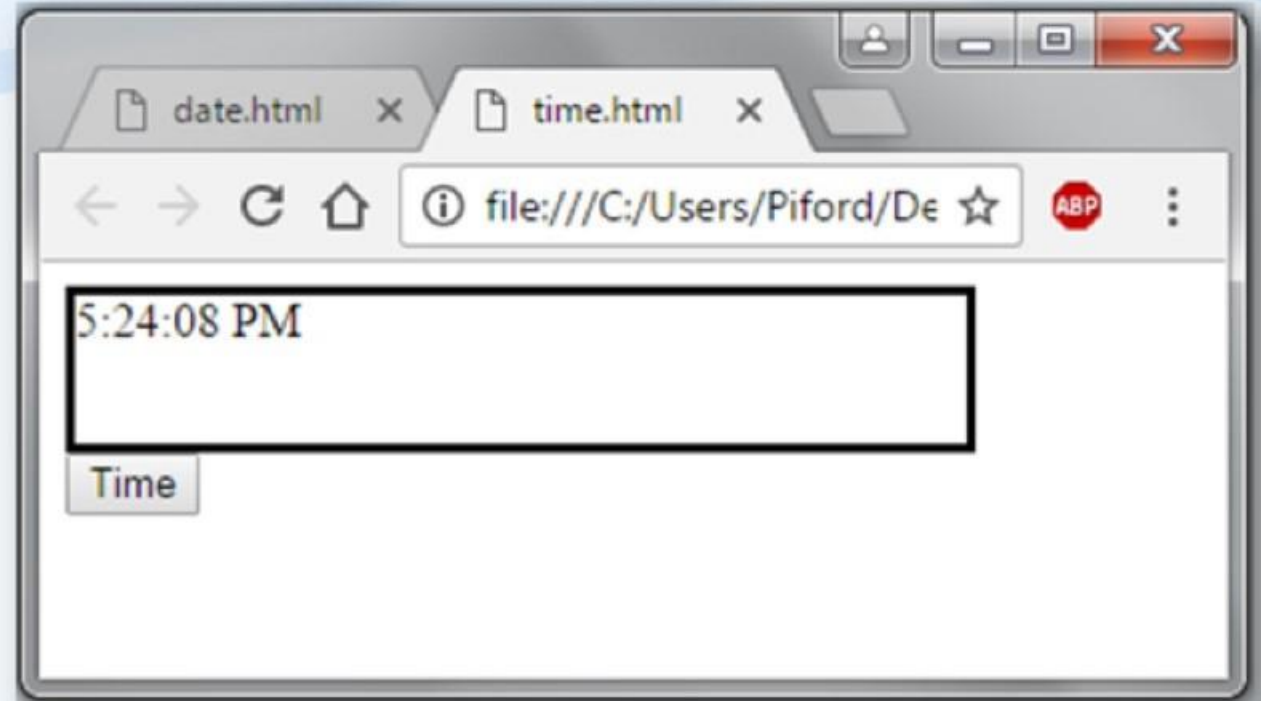

date.html ✕   time.html ✕

file:///C:/Users/Piford/De

Wed Jul 19 2017 17:23:17 GMT+0530 (India Standard Time)

Date

Created in Piford Technologies by Yash

Time

```
<script>

  function tm()

  {

    var f= new Date();

    var g= f.toLocaleTimeString();

    document.getElementById("d").innerHTML=g;

  }

</script>
```

date.html ✕ | time.html ✕

file:///C:/Users/Piford/De

5:24:08 PM

Time

Timer

```
<script>
  function tm()
  {
    var f= new Date();
    var g= f.toLocaleTimeString();
    document.getElementById("d").innerHTML=g;
    setInterval(function(){tm()},1000);
  }
</script>
```

Browser tabs: date.html | time.html

`file:///C:/Users/Piford/De`

5:24:08 PM

Time

Print

```
<head>
 <script>
  function a()
   {
    window.print();
   }
 </script>
</head>
<body>
 <input type="submit" onClick="a()">
</body>
```
